

Preceptor Guidelines

CVM 7570 Selective Swine Practice Rotation

- x The Preceptor must be a licensed veterinarian with one or more of the following: certification from the American Board of Veterinary Practitioners (ABVP) (Swine Practice), employment as a corporate swine operation veterinarian, residency trained, and/or at least five years of experience, predominately in swine practice.
- x If the Preceptor is certified through a foreign certification body, the certification process must demonstrate standards comparable to those of the relevant US national certification body or program. If there is no comparable national certification body or program, approval is at the discretion of the Committee on Clinical Instruction (CCI).
- x The Preceptor must work directly with the student and provide ongoing supervision, monitoring and feedback of the student's performance, with learning objectives and assessment documents provided by the college. The Preceptor must ensure that the student knows which doctor(s) will provide input for the evaluation.
- x The Preceptor's caseload/activity level must be of an adequate number to provide a rich educational experience. The majority of the patients must be swine cases.
- x The Preceptor at the site must be able to provide the student with at least 40 hours of contact time per week. If the primary Preceptor works at a site part-time, and the student will be working with multiple doctors, the approximate weekly work hours of each doctor must be indicated on the Preceptor Enrollment
