

Clinical Reasoning and Judgment

Objectives

1. Student is able to recognize, compare and contrast normal and abnormal examination findings
2. Student is able to draw from critical and appropriately learned facts and concepts when discussing a case (i.e. student brings adequate background knowledge to the table)
3. Student is able to prioritize abnormal findings by the degree that they contribute to the symptoms and the diagnosis, and by their potential morbidity
4. Student is able to develop and commit to supportable differential diagnosis which may evolve
